```
$ python3 solitaire_2.py
Please enter an integer to feed the seed() function: 0

There are 1140 lines of output; what do you want me to do?

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
       Q

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
       +1

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
            1

All 7s removed and placed, rest of deck shuffled, ready to start!

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
       1---3

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
       1--2406

Enter: q to quit
       a last line number (between 1 and 1140)
       a first line number (between -1 and -1140)
       a range of line numbers (of the form m--n with 1 <= m <= n <= 1140)
       1  --  3

All 7s removed and placed, rest of deck shuffled, ready to start!
